

DON'T DREAM IT, DRIVE IT

THE ALL-NEW 2023

QUDS ROADSTER

EV ELECTRA

QUDS ROADSTER 2023

QUDS Roadster is the first convertible electric vehicle from EV Electra.

The advanced carbon fiber full body with reinforced light aluminum chassis gives the vehicle high standard of safety and an outstanding performance.

The Roadster will be a breakthrough in the future of EVs if its category.

ROAM IN STYLE.

APPEARANCE.

Dominant presence with its lines and curves.

PERFORMANCE.

Swift and strong, stable and fast, driving the Roadster is one in a lifetime experience.

VALUE.

Living up to the challenge, the Roadster value defines the prestige owners' taste for perfection.

Ultra-bright Xenon head-lights with LED turn lights.

LED tail-lights that give the Roadster a great identity and personality.

Body and exterior kit parts made from ultra-light carbon fiber that lifts the overall performance and looks.

A CAR THAT DISINFECTS ITSELF!

Introducing the EV Electra UVDisinfector[®]

A UV disinfectant is installed on the vehicle's ceiling, automatically activates for 10 minutes to sterilize the cabin once it senses non activity after locking the car. Settings can be controlled via Electra application installed on your smart phone.

PERFORMANCE

GENERAL

BATTERY CAPACITY

39.5 [kWh]

MAX MOTOR POWER

150 [kW]

MAX HORSE POWER

201 [HP]

**ACCELERATION
(0-100 KM)**

2.9 [sec]

MAX SPEED

300 [KM/h]

RANGE.

Roadster travels up to 400 KM on a full charge.

Range may vary depending on the selected driving mode, weather conditions, and other circumstances.

CHARGING.

Equipped with a built-in charger and a universal plug which makes it compatible to all charging stations.

20-30 minutes to fast charge your battery from 20% to 80%.

AERODYNAMICS.

Designed to reduce drag and wind effect increasing battery efficiency and preventing lifting forces.

This unique design offers the lowest energy consumption and superior vehicle dynamics.

AUTO HOLD SYSTEM.

A component of the electronic brake system which, once activated, will automatically hold the brake pressure applied and released once the throttle pedal has been nudged.

CRUISE CONTROL.

Electronic system that provides automatic speed control to enable the vehicle to maintain constant selected speed.

PARKING SENSORS.

Functions as obstacles detector in the front or rear. The system automatically activates while parking your vehicle.

CAMERA SYSTEM.

360 degrees camera technology provides real-time view of the area surrounding your car. This security feature is accessible from the Electra application installed on your smart phone.

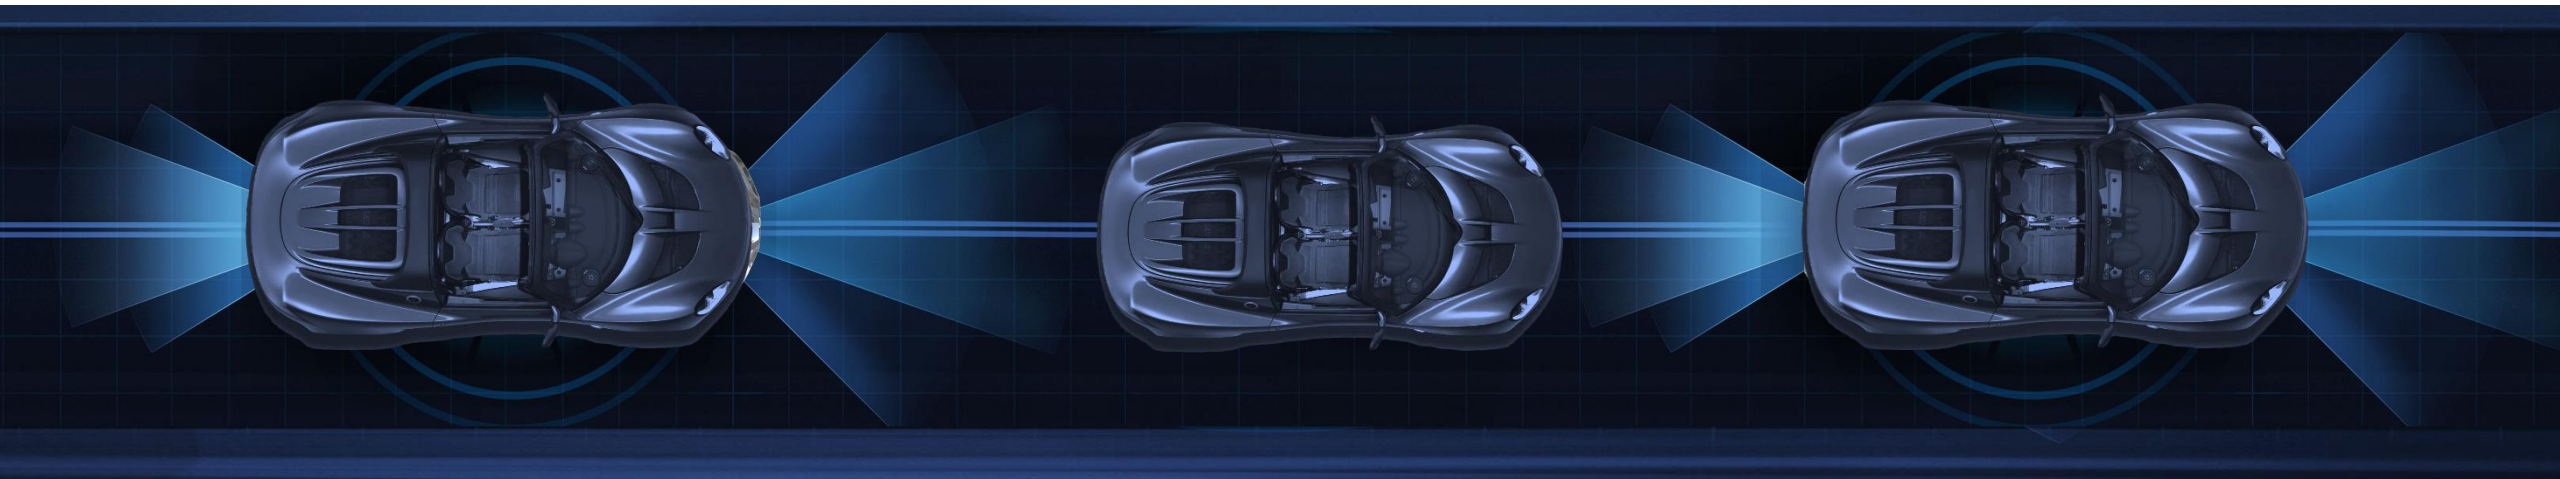

DAYTIME RUNNING LIGHTS.

DRL is a lighting system that keeps the lights on upon ignition.

The purpose is to increase the visibility of your car.

BLIND SPOT DETECTION.

Sensors mounted on the side mirrors to cover blind spots in the area alongside the vehicle. This feature is responsible for reducing accidents risks during lane changes.

ENJOYABLE DRIVING EXPERIENCE..

DETAILED SPECS
